NLIST Usage Statistics

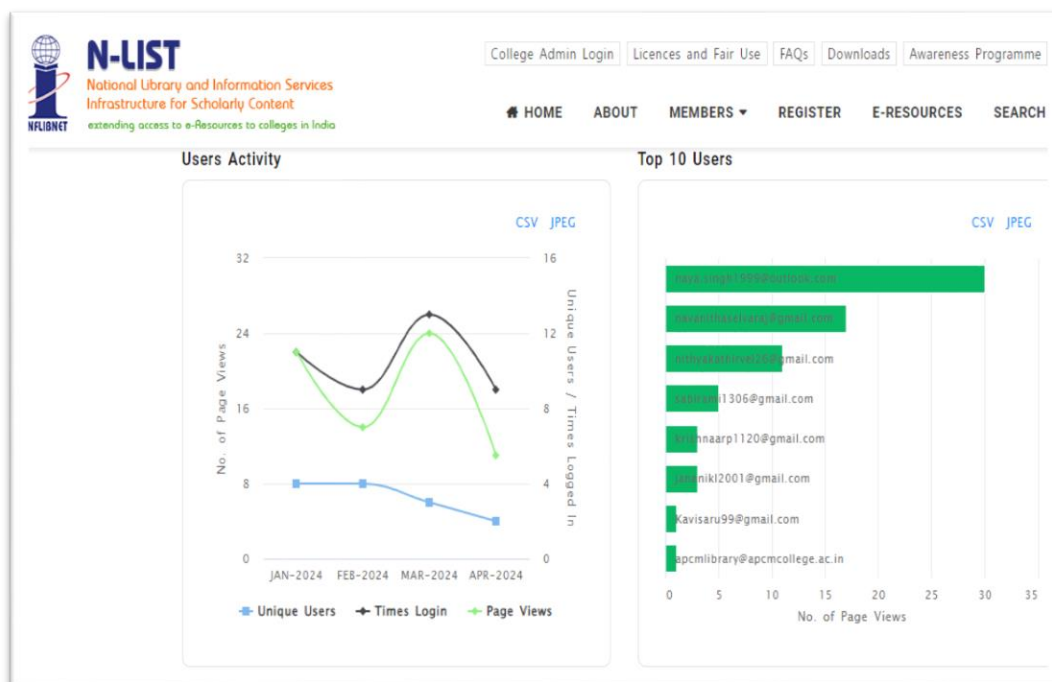

The National Library and Information Services (N-LIST) program has implemented a new reporting system for usage statistics, coinciding with the updated N-LIST Access Methodology introduced in July 2019. The revised statistics now encompass page views and unique sessions for individual users affiliated with the college, sourced from N-LIST generated logs. These usage statistics are regularly updated, typically in the first week of each month.

A comprehensive statistical report is provided below, detailing user names, usernames, departments, months, years, login frequencies, and corresponding page views.
